

Abstract

AUTOMATIC CONFIGURATION OF A SERVER

A computer system and program product for building a server according to specifications. There are a multiplicity of program objects to install a respective multiplicity of programs on the server. First program instructions determine a plurality of the program objects which currently have prerequisite software and parameters for their respective applications. Second program instructions concurrently invoke the plurality of program objects. At least one of the plurality of program objects, after execution, invokes another of the program objects, supplying a prerequisite parameter for the other program object.
